Bursa Products Overview

High-level product map for new joiners

Purpose and status

This controlled source is a concise public-product summary prepared for the BursaIQ Stage 02 competition prototype. It is not an exhaustive catalogue and must not be treated as investment advice. Product availability and specifications should be checked against Bursa Malaysia's current official pages.

Product map at a glance

Bursa's product choices span securities such as shares, structured products, ETFs, REITs, bonds and sukuk; commodity, equity and financial futures and options; Shariah-compliant participation through Bursa Malaysia-i and Bursa Suq Al-Sila'; indices; the Labuan International Financial Exchange (LFX); and Bursa Gold Dinar.

1. Securities market

Common product groups include shares, structured products such as warrants, exchange-traded funds (ETFs), real estate investment trusts (REITs), and exchange-traded bonds and sukuk.

These products have different structures, risks and eligibility requirements. This overview names categories; it is not investment advice or a complete product specification.

2. Derivatives market

Bursa Malaysia Derivatives provides commodity, equity and financial derivatives. Examples include crude palm oil futures, equity-index futures, single-stock futures, and Malaysian Government Securities futures.

If a user asks specifically about options, examples include equity-index options and options linked to crude palm oil futures. Contract availability and specifications must be checked against the current official product page.

3. Islamic market

Bursa Malaysia-i supports end-to-end Shariah-compliant securities investing. Bursa Suq Al-Sila' is a commodity trading platform that supports Islamic liquidity management and financing.

4. Other product and market areas

The broader product map also includes Bursa Malaysia indices, the Labuan International Financial Exchange (LFX), and Bursa Gold Dinar. Services such as listing, trading, clearing, settlement, depository and market information support these markets.

5. How to use this answer

Start with the user's objective: investing, hedging, Shariah-compliant participation, issuer access, or learning. Then open the relevant official product page for current eligibility, risks, fees and contract specifications.
