New Joiner Conduct Guide

Responsible information use in the BursaIQ demonstration

Purpose and status

This controlled source was created for the BursaIQ Stage 02 competition prototype. All examples are invented. Replace it only with material approved for the demonstration environment.

1. Protect information

Use only approved material in BursaIQ. Do not paste confidential, personal or market-sensitive data into a demonstration environment.

2. Check the source

Read the cited passage, date, owner and assumptions before reusing an answer. BursaIQ supports judgement; it does not replace the accountable subject-matter owner.

3. Escalate uncertainty

Send a result to Verification Centre when it may inform a management decision, external statement or people decision.

4. Communicate honestly

Label synthetic and illustrative figures. Do not present prototype access controls as production security.
